§ 725.67

§ 725.67 Applications to exempt new microorganisms from this part.

- (a) Submission. (1) Any manufacturer or importer of a new microorganism may request, under section 5(h)(4) of the Act, an exemption, in whole or in part, from this part by sending a Letter of Application to the Chief, New Chemicals Branch, Chemical Control Division, Office of Pollution Prevention and Toxics, U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.
- (2) General provisions. The Letter of Application should provide information to show that any activities affected by the requested exemption will not present an unreasonable risk of injury to health or the environment. This information should include data described in the following paragraphs.
- (i) The effects of the new microorganism on health and the environment.
- (ii) The magnitude of exposure of human beings and the environment to the new microorganism.
- (iii) The benefits of the new microorganism for various uses and the availability of substitutes for such
- (iv) The reasonably ascertainable economic consequences of granting or denying the exemption, including effects on the national economy, small business, and technological innovation.
- (3) Specific requirements. In addition to the requirements of paragraph (a)(2) of this section, the specific information requirements of the relevant subpart under which the exemption is sought should be met.
- (i) Exemption from MCAN reporting under subpart D. Information requirements are set forth in §§ 725.155 and 725.160.
- (ii) Exemption from TERA reporting under subpart E. Information requirements are set forth in $\S\S725.255$ and 725.260.
- (iii) Listing a recipient microorganism as eligible for exemption under subpart G. Information regarding the following criteria should be addressed in an application to list a recipient microorganism under §725.420:
- (A) Identification and classification of the microorganism using available genotypic and phenotypic information;

- (B) Information to evaluate the relationship of the microorganism to any other closely related microorganisms which have a potential for adverse effects on health or the environment;
- (C) A history of safe commercial use for the microorganism;
- (D) Commercial uses indicating that the microorganism products might be subject to TSCA:
- (E) Studies which indicate the potential for the microorganism to cause adverse effects to health or the environment; and
- (F) Studies which indicate the survival characteristics of the microorganism in the environment.
- (b) Processing of the Letter of Application by EPA—(1) Grant of the Application. If, after consideration of the Letter of Application and any other relevant information available to EPA, the Assistant Administrator for Prevention, Pesticides and Toxic Substances makes a preliminary determination that the new microorganism will not present an unreasonable risk of injury to health or the environment, the Assistant Administrator will propose a rule to grant the exemption using the applicable procedures in part 750 of this chapter.
- (2) Denial of the application. If the Assistant Administrator decides that the preliminary determination described in paragraph (b)(1) of this section cannot be made, the application will be denied by sending the applicant a written statement with the Assistant Administrator's reasons for denial.
- (c) Processing of the exemption—(1) Unreasonable risk standard. Granting a section 5(h)(4) exemption requires a determination that the activities will not present an unreasonable risk of injury to health or the environment.
- (i) An unreasonable risk determination under the Act is an administrative judgment that requires balancing of the harm to health or the environment that a chemical substance may cause and the magnitude and severity of that harm, against the social and economic effects on society of EPA action to reduce that harm.
- (ii) A determination of unreasonable risk under section 5(h)(4) of the Act will examine the reasonably ascertainable economic and social consequences

of granting or denying the exemption after consideration of the effect on the national economy, small business, technological innovation, the environment, and public health.

- (2) Grant of the exemption. The exemption will be granted if the Assistant Administrator determines, after consideration of all relevant evidence presented in the rulemaking proceeding described in paragraph (b)(1) of this section, that the new microorganism will not present an unreasonable risk of injury to health or the environment.
- (3) Denial of the exemption. The exemption will be denied if the Assistant Administrator determines, after consideration of all relevant evidence presented in the rulemaking proceeding described in paragraph (b)(1) of this section, that the determination described in paragraph (c)(2) of this section cannot be made. A final decision terminating the rulemaking proceeding will be published in the FEDERAL REGISTER.

§ 725.70 Compliance.

- (a) Failure to comply with any provision of this part is a violation of section 15 of the Act (15 U.S.C. 2614).
- (b) A person who manufactures or imports a microorganism before a MCAN is submitted and the MCAN review period expires is in violation of section 15 of the Act even if that person was not required to submit the MCAN under §725.105.
- (c) Using a microorganism which a person knew or had reason to know was manufactured, processed, or distributed in commerce in violation of section 5 of the Act or this part is a violation of section 15 of the Act (15 U.S.C. 2614).
- (d) Failure or refusal to establish and maintain records or to permit access to or copying of records, as required by the Act, is a violation of section 15 of the Act (15 U.S.C. 2614).
- (e) Failure or refusal to permit entry or inspection as required by section 11 of the Act is a violation of section 15 of the Act (15 U.S.C. 2614).
- (f) Violators may be subject to the civil and criminal penalties in section 16 of the Act (15 U.S.C. 2615) for each violation. Persons who submit materially misleading or false information in

connection with the requirements of any provision of this part may be subject to penalties calculated as if they never filed their submissions.

(g) EPA may seek to enjoin the manufacture or processing of a microorganism in violation of this part or act to seize any microorganism manufactured or processed in violation of this part or take other actions under the authority of section 7 of the Act (15 U.S.C. 2606) or section 17 of the Act (15 U.S.C. 2616).

§ 725.75 Inspections.

EPA will conduct inspections under section 11 of the Act to assure compliance with section 5 of the Act and this part, to verify that information required by EPA under this part is true and correct, and to audit data submitted to EPA under this part.

Subpart C—Confidentiality and Public Access to Information

§ 725.80 General provisions for confidentiality claims.

- (a) A person may assert a claim of confidentiality for any information submitted to EPA under this part. However.
- (1) Any person who asserts a claim of confidentiality for portions of the specific microorganism identity must provide the information as described in §725.85.
- (2) Any person who asserts a claim of confidentiality for a use of a microorganism must provide the information as described in § 725.88.
- (3) Any person who asserts a claim of confidentiality for information contained in a health and safety study of a microorganism must provide the information described in §725.92.
- (b) Any claim of confidentiality must accompany the information when it is submitted to EPA.
- (1) When a person submits any information under this part, including any attachments, for which claims of confidentiality are made, the claim(s) must be asserted by circling the specific information which is claimed and marking the page on which that information appears with an appropriate designation such as "trade secret," "TSCA CBI," or "confidential business information."
